PROFILE

Dedicated Software Engineer with a focus on scalable web applications, fintech innovations, and workflow enhancement. I excel in crafting and developing scalable web applications that boost organizational efficiency. With a proven history of integrating technologies, streamlining workflows, and providing impactful digital solutions, I ensure high performance and a smooth user experience.

WORK EXPERIENCE

Softrobotics Bangladesh LTD
Senior Software Enginner (Team Lead)   01-11-2023 – Till Now

- **Designed & Developed Payment Gateway Solutions** – Built secure and scalable payment integrations tailored specifically for the Turkish fintech market, enabling seamless digital transactions.
- **Error Handling & Big Data Optimization** – Implemented advanced error mapping across multiple providers to improve reliability and reduce transaction failures, optimizing system performance in high-volume data environments.
- **Cashback & Rewards System** – Developed dynamic cashback and loyalty reward modules to boost user engagement and improve customer retention.
- **POS Package Integrations** – Simplified the onboarding process for new merchants by enabling flexible POS value changes and customizable commission structures, increasing transaction adaptability.
- **User Experience & Performance** – Optimized transaction speed and digital wallet UX, improving responsiveness and customer satisfaction across devices.
- **Team Leadership & Collaboration** – Led the technical team using Jira for sprint planning and ticket management. Facilitated technical discussions, provided architectural guidance, and ensured efficient problem-solving and delivery.

Dhaka Jacos
Software Enginner   01-12-2021 - 30-10-2023

- **Requisition & Purchase Management** – Managed requisition workflows across multiple branches, enabling authorized edits before approval and ensuring purchase orders were processed based on approved requisitions.
- **Market & Supplier Coordination** – Facilitated market surveys with or without requisitions, allowing comparisons from multiple suppliers for better procurement decisions.
- **Inventory Control & Optimization** – Implemented essential inventory functions, including purchase receiving, stock transfers, product issuance, damage tracking, and stock adjustments for accurate inventory management.

Skill Based IT (SBIT)
Software Enginner   01-05-2018- 31-11-2021

- **Multivendor E-commerce System** – Engineered a scalable platform supporting multiple vendors across branches. Managed complex requisition workflows, allowing branch-level product requests, authorized edits, and approval-based purchase order generation. Enabled seamless coordination between vendors and internal procurement.rider assign and order tracking.
- **Inventory & POS Management System** – Delivered robust inventory functionality for retail and warehouse operations. Covered key modules like purchase receiving, stock transfers, product issuance, damage/loss tracking, and real-time stock adjustments—ensuring accurate reporting and smooth point-of-sale integration.
- **Courier EchoSystem for Nationwide Logistics** – Developed a courier management system tailored to Bangladesh's logistics flow, similar to Steadfast. Supported merchant onboarding, parcel booking, pickup and delivery assignments, tracking updates, and status-based workflows—integrated with the E-commerce system to streamline last-mile delivery.
